SCIENCE DEPARTMENT • SCIENCE LITERACY & LESSON INTERNALIZATION

PLC AGENDA

Refine Feedback + Revision for the Same Writing Benchmark

Science Literacy Evidence Cycle — Turn Monday's anticipated student need into one criterion-based prompt, one student action, and one evidence look-for.

TUESDAY, OCTOBER 27, 2026 | **41 MINUTES** | **GRADES 9–12 SCIENCE • BRING FORMS & EVIDENCE**

TODAY'S OUTCOME Leave with the same writing benchmark, one focused criterion, a concise feedback prompt, a clear student CER completion/revision action, an evidence look-for, and one concrete calibration artifact for Wednesday's PD.

WHY THIS PLC MATTERS Feedback contributes to learning when students use it to do more science thinking. This session turns Monday's anticipated complete/partial CER response into an actionable feedback-and-revision loop connected to the same benchmark rather than a separate literacy activity.

PROTOCOL CONNECTION
Every Day Questions 3–4 and Team Deep Dive Steps 3–5: refine the key thinking moment, feedback/facilitation, access, student action, pacing, and the next evidence look-for for the same task.

WHAT TO BRING
Monday's writing benchmark/task, source/evidence, success criteria, and anticipated response; a draft feedback prompt, exemplar, rubric note, checklist, or revision direction; one possible calibration sample or question; Lesson Internalization Tool.

FOCUS TO PROTECT
Keep feedback brief, criterion-based, and actionable. Do not rewrite the response or give students the answer; students should identify, complete, or revise claim, evidence, and reasoning themselves.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	**Carry forward the same benchmark**	Reconnect to Monday's task, evidence/source, criterion, anticipated response, feedback idea, and student action.	**Shared task**
4:00–10:00	**Select one high-leverage criterion**	Choose one visible need students can act on now: claim, evidence selection, reasoning, language, transitions, or representation.	**Feedback target**
10:00–18:00	**Write feedback that prompts CER action**	Draft a prompt that names the criterion, returns students to the source or response, and asks them to identify, complete, or revise CER.	**Prompt + action**
18:00–30:00	**Protected course-alike refinement**	Create the prompt, explicit CER completion/revision action, and evidence look-for. Confirm that the student retains responsibility for the science thinking.	**Routine ready**
30:00–36:00	**Prepare Wednesday calibration artifact**	Select one benchmark task, de-identified or anticipated response, exemplar, criteria, or feedback challenge for the 2:30–3:30 p.m. PD.	**Calibration set**
36:00–41:00	**Close + prepare to calibrate**	Check that the student action preserves demand and will produce evidence for Friday's instructional decision.	**Friday evidence plan**

PROTECTED INDIVIDUAL WORK WITH COLLEAGUE SUPPORT

WORK WITH COLLEAGUES

WHAT TO DO Use the protected block to draft the feedback prompt, student action, and evidence look-for independently first; then use colleagues to check the criterion, clarity, cognitive demand, access supports, and Wednesday calibration artifact.

1. **Return to the same writing benchmark:** Keep the prompt, source/evidence, student product, and success criterion connected to the priority standard and skill.
2. **Choose one feedback criterion:** Focus on one meaningful need: claim, evidence selection, reasoning, academic language, transitions, or representation.
3. **Write a prompt—not an answer:** Name the criterion and ask students to identify, complete, or revise CER using the source or response.
4. **State the student action + evidence look-for:** Specify what students will do and what completed or revised CER writing will make the changed thinking visible.
5. **Prepare to calibrate Wednesday:** Bring the same task and one sample, anticipated response, or feedback challenge to strengthen common expectations.

USE THIS REFERENCE DURING GROUP WORK

FEEDBACK FORMULA
Name the criterion → point students back to the source, evidence, or response → ask for one next thinking step. The prompt should preserve students' responsibility for the explanation.

STUDENT ACTION + EVIDENCE
Students identify, complete, or revise claim, evidence, and reasoning; then they may explain, compare, correct, extend, or apply learning. Name the response that will show whether it worked.

WEDNESDAY PD: BRING ONE ARTIFACT
Bring the same writing benchmark/task plus one de-identified or anticipated response, exemplar, criteria set, or feedback challenge to calibrate expectations.

COLLABORATION IN PRACTICE Protect time for thoughtful individual work; use respectful, student-centered feedback to make the next decision clearer.

TEACHER RUBRIC CONNECTION **Standard I: I-A-4 Well-Structured Lessons • Standard II: II-A-2 Student Engagement • Standard II: II-D-2 High Expectations • Standard IV: IV-A-1 Reflective Practice**

01 **Return to the benchmark**
Keep the prompt, evidence/source, criteria, and student product visible.

→

02 **Choose one criterion**
Focus on a need students can act on now.

→

03 **Write the feedback prompt**
Name the criterion and request CER completion or revision—not the answer.

→

04 **State action + evidence**
Name what students will identify, complete, or revise and what evidence will show.

→

05 **Prepare to calibrate**
Bring a task, response, exemplar, criteria set, or feedback challenge Wednesday.

TODAY'S MOVE: Criterion → feedback prompt → complete/revise CER → evidence look-for → calibration artifact
