SCIENCE DEPARTMENT • SCIENCE LITERACY & LESSON INTERNALIZATION

PD AGENDA

Strengthening Science Literacy: Calibrating Writing Benchmarks, Feedback, and Revision

Science Literacy Evidence Cycle — Calibrate the same task, CER response expectations, feedback, and revision before reviewing Friday student work.

WEDNESDAY, OCTOBER 28, 2026 • 2:30–3:30 P.M. **60 MINUTES** **GRADES 9–12 SCIENCE • BRING FORMS & EVIDENCE**

TODAY'S OUTCOME Leave with a calibrated task and bar for mastery, a shared complete/partial CER response analysis, one feedback-and-revision move, and a plan to collect student work for Friday.

WHY THIS PLC MATTERS This PD is the bridge between Monday's task internalization and Friday's student-work analysis. Calibration makes the expected science response, feedback, and revision actions clear before students complete the benchmark.

PROTOCOL CONNECTION
Every Day Questions 1, 3, and 4; Team Deep Dive Steps 3–5: clarify mastery evidence, anticipate and analyze responses, plan feedback, protect access, and collect evidence.

WHAT TO BRING
The same writing benchmark/task; annotated source or evidence; success criteria; exemplar or anticipated complete/partial CER response; feedback prompt; Lesson Internalization Tool.

FOCUS TO PROTECT
Calibrate the task and response—not teachers, students, or courses. Students use CUBS to annotate the source, then identify, complete, or revise CER.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
2:30–2:36	**Reconnect to the weekly cycle**	Keep the same benchmark, annotated source, bar for mastery, feedback, and student action at the center.	**Shared task**
2:36–2:45	**Calibrate task + bar for mastery**	Confirm the standard, prompt, source/evidence, student product, and what a complete CER response must make visible.	**Agreed bar**
2:45–2:58	**Calibrate complete + partial CER**	Use an exemplar, anticipated response, or small de-identified set to identify claim, evidence, reasoning, and likely partial thinking.	**Response analysis**
2:58–3:05	**Use CUBS/CER to make thinking visible**	Check that the routine helps students annotate the source and identify or complete the response demand—not complete an extra task.	**Student-facing routine**
3:05–3:15	**Feedback → CER revision**	Refine one criterion-based prompt and the student action: identify, complete, or revise claim, evidence, or reasoning.	**Prompt + action**
3:15–3:28	**Protected course-alike refinement**	Finalize the task, criteria, expected/partial response, feedback prompt, CER action, and Friday evidence-collection plan.	**Implementation-ready set**
3:28–3:30	**Close + collect evidence**	Teach the task, collect a small de-identified response set, and bring it Friday for instructional analysis.	**Friday evidence plan**

PROTECTED INDIVIDUAL WORK WITH COLLEAGUE SUPPORT

WORK WITH COLLEAGUES

WHAT TO DO Use the protected block to refine the shared expectations independently first; then use colleagues to check that the complete/partial CER analysis, feedback prompt, student action, and Friday evidence plan stay anchored in the same task.

1. **Anchor in the same task:** Keep the benchmark, source/evidence, student product, and success criteria connected to the priority standard and skill.
2. **Judge the bar for mastery:** Name what a complete CER response shows and how a partial response differs.
3. **Plan feedback → CER action:** Write one prompt that has students identify, complete, or revise their own claim, evidence, or reasoning.
4. **Collect student work for Friday:** Bring a small de-identified set from the same task and use available unit-test context only to deepen the instructional question.

USE THIS REFERENCE DURING GROUP WORK

CALIBRATE THE RESPONSE
Use the agreed criteria to identify what meeting the standard looks like in a complete CER and what a partial response reveals.

PROTECT STUDENT THINKING
Use CUBS to annotate the source and CER to make the response visible. Feedback sends students back to their own evidence and science idea.

BRING FRIDAY EVIDENCE
Collect a small de-identified set of completed or revised responses from the same task. Use it to identify one supported learning pattern.

COLLABORATION IN PRACTICE Protect time for thoughtful individual work; use respectful, student-centered feedback to make the next decision clearer.
TEACHER RUBRIC CONNECTION **Standard I: I-A-4 Well-Structured Lessons • Standard II: II-D-2 High Expectations • Standard IV: IV-A-1 Reflective Practice • Standard IV: IV-C-1 Professional Collaboration**
