SCIENCE DEPARTMENT / LESSON-FOCUSED PLC

Prepare and Share an Upcoming Lesson

Monday, November 9, 2026 | 46 minutes · elapsed time | All science courses: OSE + non-OSE

PURPOSE Strengthen one upcoming lesson per teacher through peer questions about teaching moves, student thinking, access, and evidence of learning.

BRING One lesson plan, student task/materials, standard, content and language goals, and draft success criteria. Ideally teach it Nov. 10 or 12; carry this same lesson into Tuesday and Friday.

HOW WE WORK Pairs/triads; every teacher speaks. Keep feedback supportive, evidence-based, and non-evaluative. No student, teacher, or course rankings; record changes in existing lesson plans.

MIN	46-MINUTE WORKING AGENDA
0–4	**Focus and partner up** Form pairs/triads; name the lesson and intended teaching date. Center scientific thinking: models, data, investigation, explanation, or discussion; use literacy in that context.
4–9	**Anchor the learning • LIT Q1** With partners, clarify the standard, content/language goals, relevance, and success criteria. What will students do or produce to show learning?
9–30	**Pre-lesson sharing • three 7-minute turns** Each teacher: 3 min share teaching/learning focus; 2 min colleague questions; 2 min record a change in the lesson plan. Show sequence, materials, checks, likely misconceptions, and student assets, identities, languages, and experiences (Q2). Pairs use turn 3 to repeat/deepen.
30–40	**Revise the lesson together** Update directions, tasks, supports, or checks without reducing grade-level thinking. Ask: Where do students do the scientific thinking? How will their prior knowledge and perspectives shape access?
40–46	**Close with an evidence plan** Each teacher shares one revision and names what evidence to collect, when, and which criterion it will reveal. Bring the revised plan Tuesday and actual lesson evidence Friday.

OUTCOME A stronger lesson plan with clear content/language success criteria, one recorded revision, and a specific evidence-collection plan.

SOURCE ALIGNMENT Pre-Lesson Sharing: teaching and learning focus. LIT Q1: learning, relevance, and evidence; Q2: identities, perspectives, and experiences.

CARRY IT FORWARD

MONDAY 11/9 → TUESDAY 11/10
Same lesson plan, your one revision, and the questions colleagues asked.

TUESDAY 11/10 → FRIDAY 11/13
The lesson you taught, 3–5 pieces of student work, and your notes.

FRIDAY 11/13 → NEXT CYCLE
Your next step, the evidence behind it, and one follow-up check.

THE LESSON-IMPROVEMENT CYCLE

PREPARE · MON 11/9
Goals + access

→

REFINE · TUE 11/10
Facilitation + pacing

→

REFLECT · FRI 11/13
Evidence → next lesson

↻ Use what you learn to prepare the next lesson.

Adapted from supplied Pre-/Post-Lesson Sharing; aligned with DESE Lesson Internalization Tool.
