SCIENCE DEPARTMENT / LESSON-FOCUSED PLC

Refine the Lesson: Facilitation, Feedback, and Pacing

Tuesday, November 10, 2026 | 46 minutes · elapsed time | All science courses: OSE + non-OSE

PURPOSE Continue Monday's lesson: use peer feedback to rehearse facilitation, sustain student thinking, and make pacing and materials workable.

BRING The same revised lesson plan, student task/materials, content/language goals, success criteria, and Monday's questions and evidence plan. If already taught, bring actual notes to inform the next use.

HOW WE WORK Pairs/triads; every teacher speaks. Keep feedback supportive, evidence-based, and non-evaluative. No student, teacher, or course rankings; record changes in existing lesson plans.

MIN	46-MINUTE WORKING AGENDA
0–4	**Reconnect to the same lesson** In pairs/triads, restate the learning goal, criteria, teaching date/status, and Monday's revision. Preserve the lesson focus across all science courses.
4–10	**Discuss and choose a priority • LIT Q3–Q4** Each teacher identifies a key moment of scientific thinking. Discuss anticipated responses, access supports, feedback, sustained task time, and materials/setup; choose one refinement priority.
10–28	**Peer refinement • three 6-minute turns** Each teacher: 2 min walk through the key moment; 2 min peer questions/feedback; 2 min record a change. Ask: What will you say/do for partial or incorrect thinking? What stays if time runs short? Pairs use turn 3 to repeat/deepen.
28–40	**Revise and rehearse with a partner** Rehearse directions, questions, feedback, and transitions. Keep the cognitive work with students; support access without lowering demand. Adjust task timing and setup to protect investigation, model/data work, explanation, or discussion.
40–46	**Commit and confirm evidence** Each teacher shares one facilitation or pacing change. Confirm what evidence to collect, when, and the content/language criterion it addresses; bring actual evidence Friday.

OUTCOME A revised and rehearsed lesson with responsive facilitation, realistic pacing/setup, and a confirmed evidence plan—not a new lesson or extra form.

SOURCE ALIGNMENT Pre-Lesson Sharing: peer questions and feedback. LIT Q3: facilitation, responses, and access; Q4: timing, sustained thinking, and materials.

CARRY IT FORWARD

MONDAY 11/9 → TUESDAY 11/10
Same lesson plan, your one revision, and the questions colleagues asked.

TUESDAY 11/10 → FRIDAY 11/13
The lesson you taught, 3–5 pieces of student work, and your notes.

FRIDAY 11/13 → NEXT CYCLE
Your next step, the evidence behind it, and one follow-up check.

THE LESSON-IMPROVEMENT CYCLE

PREPARE · MON 11/9
Goals + access

→

REFINE · TUE 11/10
Facilitation + pacing

→

REFLECT · FRI 11/13
Evidence → next lesson

↻ Use what you learn to prepare the next lesson.

Adapted from supplied Pre-/Post-Lesson Sharing; aligned with DESE Lesson Internalization Tool.
