SCIENCE DEPARTMENT / LESSON-FOCUSED PLC

Reflect on the Lesson and Plan the Next Step

Friday, November 13, 2026 | 46 minutes · elapsed time | All science courses: OSE + non-OSE

PURPOSE Reflect on implementation and examine actual student evidence to decide what to preserve, adjust, or reteach in the next lesson.

BRING The shared lesson plan, content/language goals and success criteria, implementation notes, and student evidence: models, diagrams, calculations, lab/data tables, exit responses, or discussion notes. If not taught, use a recent comparable lesson and its actual evidence; do not invent evidence.

HOW WE WORK Pairs/triads; every teacher speaks. Keep feedback supportive, evidence-based, and non-evaluative. No student, teacher, or course rankings; record changes in existing lesson plans.

MIN	46-MINUTE WORKING AGENDA
0–4	**Reconnect to the goal and criteria** In pairs/triads, identify the lesson actually taught. Restate its content/language goal and success criteria; note any change from the planned lesson.
4–10	**Quiet evidence review** Individually review actual samples against the lesson criteria. Notice scientific reasoning, strengths, misconceptions, and unanswered questions. Use a rubric only if appropriate to this lesson—not blanket grading.
10–31	**Post-lesson sharing • three 7-minute turns** Each teacher: 2 min “What happened?”; 3 min examine evidence together—“What does the evidence tell us?”; 2 min “What’s next?” Name patterns and limits before choosing an instructional response. Pairs use turn 3 to repeat/deepen.
31–40	**Revise the next lesson** Use the evidence to preserve a productive move or plan re-engagement, support, or extension. Revise the next lesson and identify one evidence check tied to the same learning need.
40–46	**Share a next-step commitment** Each teacher names the evidence-based adjustment, when it will occur, and what the follow-up check will show. Record the decision in the lesson plan.

OUTCOME An evidence-based next instructional step, a revised next lesson, and one follow-up check anchored in the lesson’s success criteria.

SOURCE ALIGNMENT Post-Lesson Sharing: What happened? What does the evidence tell us? What’s next? LIT: After the Lesson—Reflection and Forward Planning.

CARRY IT FORWARD

MONDAY 11/9 → TUESDAY 11/10
Same lesson plan, your one revision, and the questions colleagues asked.

TUESDAY 11/10 → FRIDAY 11/13
The lesson you taught, 3–5 pieces of student work, and your notes.

FRIDAY 11/13 → NEXT CYCLE
Your next step, the evidence behind it, and one follow-up check.

THE LESSON-IMPROVEMENT CYCLE

PREPARE · MON 11/9
Goals + access

→

REFINE · TUE 11/10
Facilitation + pacing

→

REFLECT · FRI 11/13
Evidence → next lesson

↻ Use what you learn to prepare the next lesson.

Adapted from supplied Pre-/Post-Lesson Sharing; aligned with DESE Lesson Internalization Tool.
