Name:_____ **Date:**_____ **Lesson:**_____

NBHS Math PLC Pre-Lesson Sharing

Purpose: In small groups, teachers will take turns sharing their plans for tomorrow's lesson. The goal is to make the plan stronger before instruction by thinking together about student learning, anticipated challenges, evidence of understanding, and possible instructional responses.

Teaching Focus:

The sharing teacher explains:

- The name of the lesson, which day of the lesson (i.e. day 2 of a 3 day lesson), etc.
- Pacing and timing: Share a rough outline of you will implement tomorrow's lesson. This should include:
  - Presentation materials: Slides, anchor charts, texts, manipulatives, etc.
  - Student activities: Explain/show any independent work, partner tasks, discussions, or group activities.
  - Checks for understanding: Formative assessments embedded throughout the lesson.
  - Exit ticket: How will students demonstrate their learning at the end of class?

Learning Focus:

The sharing teacher explains:

- What specific evidence will be collected to gauge student understanding.
  - *This will be the student work that you will be asked to bring to PLC on Wednesday.*
- Some anticipated misconceptions, struggles, or potential barriers.
- How the evidence that you collect will inform your next steps.

Notes/ideas:

NBHS Math PLC Pre-Lesson Sharing: Questions/Feedback

Teaching Focus Questions/Feedback

The listening teachers should ask questions/provide feedback on the lesson being presented.

Potential questions:

- *What directions, criteria, or examples will students need to be successful with this activity?*
- *How much time are you allocating for this section? What will you prioritize if time becomes tight?*
- *What do you anticipate students will find challenging here?*
- *What will you do if students struggle with the task? What will you do if they move through it more quickly than expected?*
- *How will students who need additional support access the same grade-level thinking?*
- *Where are students doing the mathematical thinking rather than simply receiving information?*
- *What will you be looking/listening for as you circulate during this activity?*

Potential Feedback/Affirmations:

- *I appreciate how you intentionally…*
- *I like the way you are giving students an opportunity to…*
- *I could see students really benefiting from…*
- *I wonder if you could make the student thinking more visible by…*

Learning Focus Questions/Feedback

The listening teachers should ask questions/provide feedback on the lesson being presented.

Potential Questions:

- *Will the evidence that you are collecting reveal student reasoning, explanation, thinking, etc. or just an answer?*
- *What specific misconception or misunderstanding will you be looking for?*
- *Which part of the student work will give you the strongest evidence of the learning goal?*
- *What will you do with students who do not demonstrate understanding on the exit ticket?*
- *How will you respond if most students demonstrate understanding but a smaller group does not?*
- *Is there another quick check that could provide useful evidence during another part of the lesson?*

Potential Feedback/Affirmations:

- *I could see this evidence helping you make a decision about…*
- *I like how you have already anticipated…*
- *I wonder if students could show their reasoning more clearly by…*
- *You may want to consider collecting evidence from…*
