

PLC AGENDA

Purpose & Mastery

Make the learning and the evidence of mastery clear before the lesson begins.

TUESDAY, SEPTEMBER 8, 2026

41 MINUTES

GRADES 9–12 SCIENCE • BRING THE SAME LESSON FORWARD

TODAY'S OUTCOME Leave with one upcoming lesson that has a clear content objective, targeted language objective, relevance statement, mastery task, exemplar, and usable success criteria.

WHY THIS PLC MATTERS Clear learning goals and visible evidence of mastery help teachers make intentional decisions about tasks, questions, feedback, access, and pacing before students enter the room.

PROTOCOL FOCUS

Lesson Internalization Tool — Every Day
Question 1 and Team Deep Dive Step 2: align learning, purpose, and evidence of mastery.

WHAT TO BRING

The same upcoming lesson for all three PLCs;
teacher edition; student task/materials; current unit plan; Lesson Internalization Tool.

FOCUS TO PROTECT

Keep the objective, the task, and the evidence of mastery aligned. Students should be able to say what they are learning, why, and what strong work includes.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–3:00	Welcome & purpose	Reconnect to the three-PLC arc. Keep one upcoming lesson at the center of each session.	One lesson selected
3:00–7:00	This week's arc	Preview how purpose, critical thinking, rehearsal, and refinement build one stronger student experience.	Shared planning focus
7:00–14:00	Name the learning	Identify the content objective, targeted language objective, and a meaningful connection to the unit, phenomenon, or student experience.	Clear learning + relevance
14:00–20:00	Define mastery	Match the lesson task to the objective. Review or draft an exemplar and success criteria students can use.	Mastery task + criteria
20:00–37:00	Protected team planning	Use the protocol with a course-alike team or co-teaching partner. Complete the numbered work steps below.	Purpose & mastery plan
37:00–41:00	Reflection & preview	Write: What is clearer for students because purpose and mastery were named first?	One reflection + next step

PROTECTED COLLABORATIVE WORK

WORK WITH COLLEAGUES

WHAT TO DO Complete these steps with your course-alike team or co-teaching partner.

1. Choose one lesson: Open the teacher edition and student materials for a lesson you will teach soon.

2. Name learning and relevance: Write/refine content and language objectives; connect the lesson to a unit goal, phenomenon, essential question, or student experience.

3. Make mastery visible: Name the task, review or draft a strong exemplar, and write success criteria for content, thinking, and language.

4. Check alignment: Ask: Does the task require the thinking named in the objective? Decide how students will see and use the criteria.

✓ **Completion check:** Each team leaves with one lesson plan in which the learning goal, purpose, mastery task, exemplar, and success criteria are visible to students.

USE THIS REFERENCE DURING GROUP WORK

DECISIONS TO MAKE

Write a clear content objective and targeted language objective. Connect the lesson to a unit goal, phenomenon, essential question, or student experience.

MAKE MASTERY VISIBLE

Identify the task that shows learning. Review or draft a strong response, then make success criteria usable for students before, during, or after the task.

CARRY FORWARD

Bring this same lesson, mastery task, exemplar, and success criteria to September 11 for critical-thinking and facilitation planning.

COLLABORATION IN PRACTICE Collaborate with shared responsibility: invite each voice, build on colleagues' ideas, use precise student-centered language, and keep the conversation anchored in evidence of student learning.
