NEW BEDFORD HIGH SCHOOL | SCIENCE DEPARTMENT

Science Literacy Planning & Reflection Tool

SIDE A | Sessions 1–3: Benchmark, Student Thinking & Success Criteria

Teacher / Team: **Course:** **Unit / Lesson / Standard:**

PURPOSE. Twelve numbered prompts carry the full day. Complete each one during its session; each prompt names the product it builds and feeds directly into the next.

COMPLETE DURING SESSION 1 · BENCHMARK | PRODUCT: PRODUCT 1 · BENCHMARK

1 WRITING BENCHMARK

Draft the response or list its essential parts: science content, evidence or data, reasoning, vocabulary, and clear writing. What have students done well before? What needs the most support next?

COMPLETE DURING SESSION 2 · STUDENT THINKING & SUPPORT | PRODUCT: PRODUCT 2 · RESPONSE GUIDE

2 EXPECTED RESPONSE & LIKELY THINKING

Use the benchmark to name the essential response elements. What two or three strengths, partial understandings, or misconceptions are likely? What evidence will show each one?

COMPLETE DURING SESSION 2 · STUDENT THINKING & SUPPORT | PRODUCT: PRODUCT 2 · RESPONSE GUIDE

3 READING & WRITING SUPPORTS

Choose two or three supports students will use for this task — CUBS, color-coded CER, annotation, sentence frames, vocabulary support, or an exemplar. State when each support appears in the lesson.

COMPLETE DURING TEACHER SHARING | PRODUCT: PRODUCT 3 · SUCCESS CRITERIA

4 HOW STUDENTS SEE QUALITY

Describe one routine already used to make quality visible, the student action it produces, and one idea to adapt from a colleague.

COMPLETE DURING SESSION 3 · SUCCESS CRITERIA | PRODUCT: PRODUCT 3 · SUCCESS CRITERIA

5 STUDENT-FACING SUCCESS CRITERIA

Write three to five observable indicators tied to the benchmark. How will students see and use them: model annotation, a checklist, color coding, a self-check, or peer feedback?

COMPLETE DURING CRITERIA-TO-LESSON PLANNING | PRODUCT: PRODUCT 4 · LESSON PLAN

6 CRITERIA PLACED IN THE LESSON

Where do the criteria appear in the lesson — introduced, made concrete with the benchmark, used during the work, named in feedback, acted on in revision? Note the moment for each.

Science Literacy Planning & Reflection Tool

SIDE B | Sessions 4–6: Lesson, Feedback & Friday Evidence

PURPOSE. These prompts build the ready-to-teach lesson, the feedback students will act on, and the evidence set for Friday, November 6.

COMPLETE DURING RE-ENTRY | PRODUCT: PRODUCT 4 · LESSON PLAN

7 WHAT THE MORNING PRODUCED

Name the one part of the morning work that changed how this lesson will be taught, and the part that still needs clarity.

COMPLETE DURING SESSION 4 · LESSON PLANNING | PRODUCT: PRODUCT 4 · LESSON PLAN

8 READY-TO-TEACH LESSON PLAN

Map the lesson: the task, the reading or writing strategy, when criteria are visible, when work is checked, and when students use feedback. Note the protected thinking and writing time.

COMPLETE DURING SESSION 5 · FEEDBACK | PRODUCT: PRODUCT 4 · LESSON PLAN

9 FEEDBACK & STUDENT ACTION

How is feedback usually given, and what has worked best? Plan one feedback moment tied to a criterion. What will students do next: revise, add evidence, explain, re-read, annotate, or practice?

COMPLETE DURING STUDENT ACTION | PRODUCT: PRODUCT 4 · LESSON PLAN

10 REVISION AFTER FEEDBACK

What will students revise, and how will you know the revision improved the work? Name the evidence to look for in the revised response.

COMPLETE DURING SESSION 6 · FRIDAY EVIDENCE | PRODUCT: PRODUCT 5 · FRIDAY EVIDENCE

11 FRIDAY EVIDENCE & NEXT STEP

Bring three to five student samples. What will the team look for Friday? What next step will improve students' reading, writing, or scientific explanation?

COMPLETE DURING CLOSING REFLECTION | PRODUCT: PRODUCT 5 · FRIDAY EVIDENCE

12 REFLECTION & COMMITMENT

What worked today? What will be tried first, what support is needed, and what question should Friday's student work answer?
