

PLC AGENDA

Set Up a Simple Evidence Routine

Prepare one low-lift way to capture student thinking during the lesson.

TUESDAY, SEPTEMBER 15, 2026

41 MINUTES

GRADES 9–12 SCIENCE • BRING THE SAME LESSON FORWARD

TODAY'S OUTCOME Leave with one simple evidence-capture routine: when to collect one student response or artifact, what to save, and how the team will review it after the lesson.

WHY THIS PLC MATTERS September 11 named what teachers would listen and look for. This session makes the capture routine practical, so usable evidence is available for review after students experience the lesson.

PROTOCOL FOCUS

Lesson Internalization Tool — After-Lesson Reflection preparation: connect an evidence source, capture routine, and later instructional decision.

WHAT TO BRING

A ready-to-teach lesson; student task or materials; the Lesson Internalization Tool; and one simple option for capturing evidence.

FOCUS TO PROTECT

Choose one feasible collection routine. Start with the ready-to-teach lesson; do not reopen the purpose, mastery, or facilitation plan.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	Reconnect	Bring forward the ready-to-teach lesson from September 14 and choose one moment where you can capture evidence.	Selected evidence moment
4:00–10:00	Set the routine	Choose one response or artifact to collect, when to collect it, and how many examples you need.	One capture routine
10:00–31:00	Protected team work	Use the protocol with a course-alike team or co-teaching partner to prepare a low-lift routine for collecting and saving evidence.	Evidence-capture routine
31:00–37:00	Peer check	Check that the routine is feasible during the lesson and will reveal how students are approaching the learning goal.	Feasible routine
37:00–41:00	Reflection & close	Write: What will you collect, and when will you collect it?	Capture statement

PROTECTED COLLABORATIVE WORK

WORK WITH COLLEAGUES

WHAT TO DO Complete these steps with your course-alike team or co-teaching partner.

- 1. Start with the ready-to-teach plan:** Use the lesson already prepared in the September 8–14 cycle; choose one task or moment for evidence collection.
 - 2. Choose one evidence item:** Decide on one student response, work sample, exit response, observation tally, or brief note to capture.
 - 3. Set the routine:** Specify when and how you will collect it without interrupting students' work or the lesson flow.
 - 4. Prepare the review path:** Decide where the evidence will be saved and what the team will examine together after the lesson.
- ✓ **Completion check:** Each teacher leaves with one usable evidence-capture routine connected to a ready-to-teach lesson.

USE THIS REFERENCE DURING GROUP WORK

START WITH THE PLAN

Use the lesson already refined in the prior PLC arc. Today adds an evidence routine; it does not reopen the lesson plan.

EVIDENCE ITEM

Choose one response, work sample, exit response, tally, or observation note that will help the team learn from the lesson.

CAPTURE ROUTINE

Specify when, how, and where the evidence will be collected and saved for the September 18 review.

COLLABORATION IN PRACTICE Collaborate with a practical focus: select one low-lift routine, protect the lesson flow, and make sure the evidence will be available for the team's September 18 review.
