

PLC
AGENDA

From Evidence to the Next Student Action

Use an actual learning pattern to plan what students will do next.

MONDAY, SEPTEMBER 21, 2026

41 MINUTES

GRADES 9–12 SCIENCE • BRING THE SAME LESSON FORWARD

TODAY'S OUTCOME Leave with one evidence-based next student action: a short follow-up task, prompt, discussion routine, or support that helps students revise, explain, compare, apply, or extend their thinking.

WHY THIS PLC MATTERS September 11 anticipated facilitation before teaching. This session begins with actual student evidence and determines the next action students need after the lesson.

PROTOCOL FOCUS

Lesson Internalization Tool — After-Lesson Reflection and Forward Planning: use a documented learning pattern to plan the next student action while keeping the cognitive demand intact.

WHAT TO BRING

The shared learning pattern from September 18; related next-lesson materials; and the Lesson Internalization Tool.

FOCUS TO PROTECT

Do not revisit possible responses from before teaching. Use the actual evidence pattern to decide the next action students will take.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	Reconnect	Bring forward the shared learning pattern from September 18 and restate the original learning goal.	Shared learning pattern
4:00–10:00	Name the next action	Decide what students should do next because of the evidence: revise, explain, compare, model, discuss, correct, extend, or apply.	Next student action
10:00–31:00	Protected team work	Design one short follow-up: a prompt, task, discussion routine, feedback step, representation, grouping move, or access support.	Evidence-based follow-up
31:00–37:00	Check the follow-up	Practice the student direction and confirm that the next action responds to the evidence without removing the thinking.	Ready follow-up step
37:00–41:00	Reflection & close	Write: What new evidence will show whether this next action helped?	Next evidence look-for

PROTECTED COLLABORATIVE WORKWORK
WITH
COLLEAGUES

WHAT TO DO Complete these steps with your course-alike team or co-teaching partner.

- 1. Restate the actual pattern:** Name what the September 18 evidence showed about student thinking.
 - 2. Name the next student action:** Decide what students need to do next: revise, explain, compare, model, discuss, correct, extend, or apply.
 - 3. Design the follow-up:** Create one short task, prompt, discussion routine, feedback step, representation, grouping move, or support.
 - 4. Check the new evidence:** Name what student response will show whether the follow-up helped students move forward.
- ✓ **Completion check:** Each teacher leaves with one evidence-based follow-up that prompts a clear next student action and a new evidence look-for.

USE THIS REFERENCE DURING GROUP WORK**ACTUAL EVIDENCE**

Start with the documented learning pattern from September 18, not a predicted response from before the lesson.

NEXT STUDENT ACTION

Choose what students will do next: explain, revise, model, discuss, correct, extend, or apply.

NEW EVIDENCE

Name the short response or artifact that will show whether the follow-up moved the learning forward.

COLLABORATION IN PRACTICE Collaborate from the evidence: turn one actual learning pattern into one practical next action for students, then decide what new evidence will matter.

Classroom Teacher Model Rubric Connection — Standard II: II-A-1 Quality of Effort and Work • II-A-2 Student Engagement • II-D-3 Access to Knowledge
