

PLC AGENDA

Replan the Next Learning Experience

Use student evidence to strengthen the next lesson.

TUESDAY, SEPTEMBER 22, 2026

41 MINUTES

GRADES 9–12 SCIENCE • BRING THE SAME LESSON FORWARD

TODAY'S OUTCOME Leave with the next lesson revised in one visible way: purpose, task, question, representation, grouping, pacing, access support, feedback, or student-evidence plan.

WHY THIS PLC MATTERS Student evidence has the most impact when it changes what students experience next. This session revises a later lesson in the sequence—not the ready-to-teach lesson refined on September 14—using the team's evidence review and follow-up decision.

PROTOCOL FOCUS

Lesson Internalization Tool — Every Day
Questions 1, 3, and 4: purpose and mastery; key thinking and facilitation; timing, materials, and the student experience.

WHAT TO BRING

A later lesson in the sequence; the evidence pattern and next student action from the prior sessions; lesson materials; and the Lesson Internalization Tool.

FOCUS TO PROTECT

Make one meaningful revision to a later lesson rather than revising everything. The adjustment should respond to evidence while keeping the intended learning and grade-level thinking clear.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	Reconnect	Bring forward the next lesson, the learning pattern, and the planned response from the prior PLC sessions.	Connected planning materials
4:00–10:00	Choose one revision	Decide which element of the next lesson should change because of the evidence: purpose, task, question, support, timing, grouping, or feedback.	Priority revision
10:00–31:00	Protected team work	Revise the next learning experience. Check that the purpose, mastery task, key thinking, materials, timing, and student evidence remain coherent.	Revised next lesson
31:00–37:00	Peer check	Share the revision with a colleague. Check that the change responds to evidence and maintains the lesson's cognitive demand.	Strengthened revision
37:00–41:00	Reflection & close	Write: What will students experience differently because of this revision?	Student-experience statement

PROTECTED COLLABORATIVE WORK

WORK WITH COLLEAGUES

WHAT TO DO Complete these steps with your course-alike team or co-teaching partner.

- 1. Bring the evidence forward:** Start with the student-learning pattern and the response that was planned.
 - 2. Choose one element to revise:** Adjust a purposeful part of the next lesson rather than making broad changes.
 - 3. Check coherence:** Make sure the purpose, mastery task, key thinking, supports, materials, timing, and evidence plan work together.
 - 4. Make the change visible:** Mark the revision in the lesson plan, student materials, questions, or facilitation notes.
- ✓ **Completion check:** Each teacher leaves with a revised next lesson and one visible adjustment that responds to student evidence.

USE THIS REFERENCE DURING GROUP WORK

PURPOSE & MASTERY

Confirm that students can understand the learning goal, why it matters, and the task that will show learning.

KEY THINKING

Protect sustained time for the most important reasoning, explanation, modeling, or use of evidence.

STUDENT EXPERIENCE

Check materials, transitions, access supports, feedback, and the evidence students will produce in the revised lesson.

COLLABORATION IN PRACTICE Collaborate with shared responsibility: use the evidence to make one practical revision and keep the conversation centered on what students will experience next.

Classroom Teacher Model Rubric Connection — Standards I & II: I-A-4 Well-Structured Lessons • II-A-1 Quality of Effort and Work • II-D-3 Access to Knowledge
