

PLC
AGENDA

Share, Calibrate & Set the Next Cycle

Use the full cycle to strengthen the next team decision.

FRIDAY, SEPTEMBER 25, 2026

46 MINUTES

GRADES 9–12 SCIENCE • BRING THE SAME LESSON FORWARD

TODAY'S OUTCOME Leave with a concise team action plan for the next cycle: the evidence the team will notice, the learning pattern it will examine, and the instructional response it will carry into the next lesson.

WHY THIS PLC MATTERS A sustainable PLC cycle connects planning, student evidence, response, and forward planning. This session helps teams retain the practices that worked and choose a manageable focus for the next cycle.

PROTOCOL FOCUS

Lesson Internalization Tool — After-Lesson Reflection and Forward Planning; Team Deep Dive synthesis: use student evidence, facilitation choices, and the next instructional decision to strengthen future learning.

WHAT TO BRING

The team's evidence plan, student-learning pattern, planned response, revised next lesson, and the Lesson Internalization Tool.

FOCUS TO PROTECT

Keep the next cycle focused and usable. Select one shared learning priority and a small number of practices that teams can carry forward together.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–5:00	Reconnect	Review the cycle: plan to notice, review evidence, respond, and replan the next learning experience.	Shared arc overview
5:00–12:00	Calibrate the learning	Share a concise before-and-after account: what evidence was planned, what pattern appeared, and what response was selected.	Team learning summary
12:00–34:00	Protected team work	Identify what the team will carry forward: a student-evidence routine, a discussion or feedback move, and one shared learning priority.	Next-cycle action plan
34:00–41:00	Prepare the next cycle	Choose one upcoming lesson and identify the first protocol question the team will revisit together.	Selected lesson and focus
41:00–46:00	Reflection & close	Write: What practice will our team carry into the next Lesson Internalization cycle?	Team commitment

PROTECTED COLLABORATIVE WORKWORK
WITH
COLLEAGUES

WHAT TO DO Complete these steps with your course-alike team or co-teaching partner.

- 1. Share the learning cycle:** Briefly name the evidence planned, the pattern noticed, the response selected, and the revision made.
 - 2. Calibrate the practice:** Discuss which planning or facilitation moves were most useful for understanding student learning.
 - 3. Set one shared priority:** Select a manageable focus for the next cycle, connected to student evidence and the next lesson.
 - 4. Choose the first step:** Identify the next upcoming lesson and the Lesson Internalization Tool question the team will use first.
- ✓ **Completion check:** Each team leaves with a concise action plan for the next Lesson Internalization cycle and a selected lesson to bring forward.

USE THIS REFERENCE DURING GROUP WORK**PLAN → NOTICE**

Identify the student evidence that will matter before the lesson begins.

NOTICE → RESPOND

Use a shared learning pattern to select a response that keeps students doing the thinking.

RESPOND → REPLAN

Carry the response into the next lesson and make one purposeful adjustment visible.

COLLABORATION IN PRACTICE Collaborate as a learning team: share evidence, build on colleagues' ideas, identify a focused priority, and leave with an actionable next step for students.
