

PLC
AGENDA

Student Evidence to Feedback & Next Steps

Plan feedback students can use and prepare for the action they will take next.

TUESDAY, SEPTEMBER 22, 2026

41 MINUTES

GRADES 9–12 SCIENCE • BRING THE SAME LESSON FORWARD

TODAY'S OUTCOME Leave with a clear feedback plan: what students need to hear, how the feedback will be given, how students may respond, and the support or next action the team may need to provide.

WHY THIS PLC MATTERS Feedback impacts learning when it prompts students to take an action. Planning the feedback, its delivery, and the anticipated student response makes that action more likely and keeps the work connected to actual evidence.

PROTOCOL FOCUS

Lesson Internalization Tool — After-Lesson Reflection and Forward Planning; Team Deep Dive Step 4: use student evidence to provide feedback and plan the next instructional decision.

WHAT TO BRING

The assessment or student work the team will analyze; or another available evidence source such as exit responses, quiz items, observation notes, discussion notes, or models; related lesson materials; and the Lesson Internalization Tool.

FOCUS TO PROTECT

Keep feedback specific, actionable, and anchored in evidence. Feedback should prompt students to revise, reflect, correct, extend, or apply—not complete the thinking for them.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	Choose what to analyze	Identify the assessment or student work the team will analyze. Restate the learning goal connected to that evidence.	Selected assessment/work + learning target
4:00–12:00	Decide what feedback	Determine what students need to hear next. Write feedback that points students toward one clear action.	Feedback message + next action
12:00–20:00	Decide how feedback	Choose how and when students will receive it: written feedback, conference, whole-class feedback, discussion, model, revision prompt, or another routine.	Feedback delivery plan
20:00–33:00	Anticipate response & support	Predict how students may respond. Plan the intervention, revision opportunity, extension, or other support that may be needed.	Anticipated response + support
33:00–38:00	Group share-out	Share one feedback decision, how students will act on it, and one anticipated need.	Team feedback insight
38:00–41:00	Reflection & close	Write: What student action will show that the feedback helped learning move forward?	Student-action look-for

PROTECTED COLLABORATIVE WORK**WORK
WITH
COLLEAGUES**

WHAT TO DO Complete these steps with your course-alike team or co-teaching partner.

- 1. Choose the work to analyze:** Select the assessment or student work the team will analyze, then name the learning goal connected to it.
 - 2. Plan what students need to hear:** Choose feedback that identifies the next student action: revise, reflect, correct, extend, or apply.
 - 3. Choose how feedback will be given:** Decide the delivery method and when students will have time to use the feedback.
 - 4. Anticipate response and support:** Predict how students may respond and plan the intervention, revision opportunity, extension, or next action they may need.
- ✓ **Completion check:** Each team leaves with one feedback plan, a delivery method, an anticipated student response, and a planned support or next action.

USE THIS REFERENCE DURING GROUP WORK**FEEDBACK → ACTION**

State feedback so students know what they can do next: revise, reflect, correct, extend, or apply their learning.

HOW FEEDBACK WILL REACH STUDENTS

Choose a delivery method and make time for students to read, discuss, use, or respond to the feedback.

ANTICIPATE THE RESPONSE

Plan for the likely response: a revision, a question, a misconception, an extension, or a need for additional support.

COLLABORATION IN PRACTICE Collaborate with precision and care: focus on shared evidence, use asset-based language about students, and design feedback that keeps students responsible for the thinking.
