

PLC AGENDA

SCIENCE DEPARTMENT • LESSON INTERNALIZATION SERIES

Replan the Next Learning Experience

Use student evidence and feedback planning to strengthen the next lesson.

FRIDAY, SEPTEMBER 25, 2026

46 MINUTES

GRADES 9–12 SCIENCE • BRING THE SAME LESSON FORWARD

TODAY'S OUTCOME Leave with the next lesson revised in one visible way: purpose, task, question, representation, grouping, pacing, access support, feedback, or student-evidence plan.

WHY THIS PLC MATTERS The team now has an evidence pattern, a feedback plan, and an anticipated student response. This session carries those decisions into a later lesson in the sequence so students experience a purposeful next step.

PROTOCOL FOCUS

Lesson Internalization Tool — Every Day Questions 1, 3, and 4: purpose and mastery; key thinking and facilitation; timing, materials, and the student experience.

WHAT TO BRING

A later lesson in the sequence; the evidence pattern, feedback plan, anticipated student response, lesson materials; and the Lesson Internalization Tool.

FOCUS TO PROTECT

Make one meaningful revision to a later lesson rather than revising everything. The adjustment should respond to evidence and planned feedback while keeping grade-level thinking clear.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	Reconnect	Bring forward the next lesson, the evidence pattern, feedback plan, and anticipated student response.	Connected planning materials
4:00–10:00	Choose one revision	Decide which element of the next lesson should change because of the evidence and feedback: purpose, task, question, support, timing, grouping, or feedback.	Priority revision
10:00–33:00	Protected team work	Revise the next learning experience. Check that purpose, mastery, key thinking, materials, timing, feedback, and student evidence remain coherent.	Revised next lesson
33:00–40:00	Peer check	Share the revision with a colleague. Check that the change responds to evidence, gives students a next action, and maintains cognitive demand.	Strengthened revision
40:00–46:00	Reflection & close	Write: What will students experience differently because of this revision?	Student-experience statement

PROTECTED COLLABORATIVE WORK

WORK WITH COLLEAGUES

WHAT TO DO Complete these steps with your course-alike team or co-teaching partner.

- 1. Bring the evidence and feedback forward:** Start with the learning pattern, feedback plan, and anticipated student response from the prior sessions.
 - 2. Choose one element to revise:** Adjust a purposeful part of the next lesson rather than making broad changes.
 - 3. Check coherence:** Make sure purpose, mastery task, key thinking, supports, materials, timing, feedback, and evidence plan work together.
 - 4. Make the change visible:** Mark the revision in the lesson plan, student materials, questions, or facilitation notes.
- ✓ **Completion check:** Each teacher leaves with a revised next lesson and one visible adjustment that responds to student evidence and planned feedback.

USE THIS REFERENCE DURING GROUP WORK

PURPOSE & MASTERY Confirm that students can understand the learning goal, why it matters, and the task that will show learning.	KEY THINKING Protect sustained time for the most important reasoning, explanation, modeling, or use of evidence.	STUDENT EXPERIENCE Check materials, transitions, access supports, feedback, and the evidence students will produce in the revised lesson.
---	--	---

COLLABORATION IN PRACTICE Collaborate with shared responsibility: use evidence and planned feedback to make one practical revision and keep the conversation centered on what students will experience next.

Classroom Teacher Model Rubric Connection — Standards I & II: I-A-4 Well-Structured Lessons • II-A-1 Quality of Effort and Work • II-D-3 Access to Knowledge
