

PLC AGENDA

SCIENCE DEPARTMENT • LESSON INTERNALIZATION & GOAL SETTING

From Goals to an Educator Plan

Turn the Student Learning Goal and Professional Practice Goal into a practical upcoming-lesson plan with actions, supports, timeline, and a feedback-for-improvement loop.

MONDAY, OCTOBER 5, 2026

41 MINUTES

GRADES 9–12 SCIENCE • BRING FORMS & EVIDENCE

TODAY'S OUTCOME Leave with the Educator Plan Form substantially drafted: actions for both goals, supports/resources, a timeline or frequency, one first implementation lesson, and a plan to receive feedback for improvement.

WHY THIS PLC MATTERS Goals become useful when they appear in real lessons. The Educator Plan connects the goal forms to the lesson internalization cycle: plan, teach, collect evidence, reflect, and adjust.

PROTOCOL CONNECTION

Questions 3–4 and Team Deep Dive Steps 3–5: plan the lesson moment, feedback/facilitation, access and student experience, anticipated responses, and the evidence you will collect.

WHAT TO BRING

Goal Setting Form; Self-Assessment Form; Educator Plan Form; one upcoming lesson or curriculum materials; Lesson Internalization Tool.

FOCUS TO PROTECT

Plan one manageable routine in an upcoming lesson. Do not write a broad list of activities or try to redesign every part of instruction.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	Reconnect	Place the Goal Setting and Self-Assessment Forms next to the Educator Plan Form. Restate the student-learning need and practice focus.	Forms connected
4:00–10:00	Choose the first lesson	Select one upcoming lesson where the practice can be applied. Identify the key task, question, or student-work moment.	First lesson identified
10:00–17:00	Plan the instructional move	Use Questions 3–4 to plan feedback, facilitation, discourse, access, engagement, pacing, or materials connected to the practice goal.	Action identified
17:00–32:00	Protected form work	Complete planned activities, supports/resources, and timeline/frequency for both the Student Learning and Professional Practice goals.	Educator Plan draft
32:00–37:00	Add the feedback loop	Name who will provide feedback, what lesson evidence you will bring, and how the feedback will shape the next lesson decision.	Feedback-for-improvement loop
37:00–41:00	Close & prepare	Save the plan and bring the identified upcoming lesson Tuesday to plan actionable feedback for students.	Implementation lesson ready

PROTECTED INDIVIDUAL WORK WITH COLLEAGUE SUPPORT

WORK WITH COLLEAGUES	WHAT TO DO Complete the designated form work individually first; use colleagues for clarification, feedback, and calibration. 1. Name the first implementation lesson: Choose a real lesson, task, investigation, discussion, or assessment moment. 2. Write the action: State the instructional move you will use and the student-learning need it addresses. 3. Write supports and resources: Name curriculum materials, course-alike planning, protocol use, student work review, coaching, or feedback. 4. Set timeline or frequency: Decide when and how often you will use and revisit the practice. 5. Plan feedback for improvement: Identify evidence, a feedback partner or source, and the next reflection point.
-----------------------------	---

USE THIS REFERENCE DURING GROUP WORK

EDUCATOR PLAN: ACTION Describe the lesson-internalization practice you will use in an upcoming lesson—not simply the task students will complete.	SUPPORTS + TIMELINE Record the materials, course-alike support, feedback, and timing that make the action realistic and repeatable.	NEXT EVIDENCE CHECK Name what students will say, do, or produce and when you will reflect on it with colleagues or a feedback partner.
COLLABORATION IN PRACTICE Protect time for thoughtful individual work; use respectful, student-centered feedback to make the next decision clearer. TEACHER RUBRIC CONNECTION Standard IV: IV-A-2 Goal Setting • IV-C-1 Professional Collaboration
