

PLC AGENDA

SCIENCE DEPARTMENT • LESSON INTERNALIZATION & GOAL SETTING

Plan Feedback That Prompts Student Action

Use the Educator Plan and Lesson Internalization Tool to plan feedback students can use to revise, correct, extend, explain, or apply their thinking.

TUESDAY, OCTOBER 6, 2026

41 MINUTES

GRADES 9–12 SCIENCE • BRING FORMS & EVIDENCE

TODAY'S OUTCOME Leave with a feedback routine for one upcoming lesson: the evidence students will receive feedback on, what the feedback will communicate, how students will act on it, and what you will notice next.

WHY THIS PLC MATTERS The September PLCs established that feedback impacts learning when it prompts a student action. This session applies that idea directly to the implementation lesson named in the Educator Plan.

PROTOCOL CONNECTION

Question 3: anticipate student thinking and plan feedback/facilitation. Question 4: plan a student experience where every learner can access, understand, and act on the feedback.

WHAT TO BRING

Educator Plan Form; Goal Setting Form; one upcoming lesson/task; anticipated student work or current work samples if available; Lesson Internalization Tool.

FOCUS TO PROTECT

Feedback must lead to a clear next student action. Avoid generic praise, correction without a next step, or feedback that takes over the thinking.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	Reconnect	Bring forward the Educator Plan and first implementation lesson. Restate the student-learning need and the practice goal.	Lesson + goals ready
4:00–10:00	Locate the feedback moment	Identify the exact task, question, model, explanation, discussion, or response where students will show thinking.	Evidence moment selected
10:00–17:00	Name the student action	Decide whether students will revise, correct, extend, explain, compare, or apply feedback to a new task.	Student action named
17:00–31:00	Protected planning time	Plan what feedback says, how/when it is delivered, how students will use it, and what evidence you will collect after the action.	Feedback routine draft
31:00–37:00	Course-alike rehearsal	Practice one feedback prompt or question. Check that it preserves cognitive demand and makes the student next step visible.	Revised feedback prompt
37:00–41:00	Close & evidence check	Mark the student action and evidence look-for. Bring a small evidence set or observation notes Friday if implementation occurs.	Next evidence check

PROTECTED INDIVIDUAL WORK WITH COLLEAGUE SUPPORT

WORK WITH COLLEAGUES	WHAT TO DO Complete the designated form work individually first; use colleagues for clarification, feedback, and calibration. 1. Choose the evidence moment: Identify where student thinking becomes visible in the lesson. 2. Write the feedback message: Make it specific to the learning—not a score, praise-only comment, or answer. 3. Name the student action: Decide exactly what students will do with the feedback. 4. Plan access and participation: Make sure all students can understand the feedback and have time to act on it. 5. Set the evidence look-for: Decide what you will collect or notice after students act.
-----------------------------	---

USE THIS REFERENCE DURING GROUP WORK

FEEDBACK ROUTINE Evidence of thinking → specific feedback → student action → new evidence. This is the learning loop to plan and notice.	STUDENT ACTIONS Revise • Reflect • Correct • Extend • Apply feedback to a new task. Choose the action that matches the learning need.	PROTECT THE THINKING Use questions, prompts, criteria, and targeted supports that help students do the cognitive work rather than receiving the answer.
--	---	---

COLLABORATION IN PRACTICE Protect time for thoughtful individual work; use respectful, student-centered feedback to make the next decision clearer.
