

PLC AGENDA

Rehearse the Feedback Loop & Set the Next Evidence Check

Use the Lesson Internalization Tool to rehearse the feedback-to-action routine, examine available student evidence or anticipated responses, and adjust the next learning experience.

FRIDAY, OCTOBER 9, 2026

46 MINUTES

GRADES 9–12 SCIENCE • BRING FORMS & EVIDENCE

TODAY'S OUTCOME Leave with a rehearsed feedback-to-action routine, one clear student-evidence look-for, and a next-lesson adjustment connected to the goals and Educator Plan.

WHY THIS PLC MATTERS The planning cycle is complete only when teachers return to student thinking. This PLC protects time to consider whether feedback prompts action and what the next lesson should make possible for students.

PROTOCOL CONNECTION

Question 3: facilitate for deeper learning through feedback and student thinking. Question 4 and After-Lesson Reflection: examine the student experience, evidence, and next instructional decision.

WHAT TO BRING

Educator Plan and feedback routine; a small student-work sample, exit response, or observation notes if available; otherwise bring anticipated student responses and the upcoming lesson; Lesson Internalization Tool.

FOCUS TO PROTECT

Use actual evidence when available. If the lesson has not yet occurred, rehearse with anticipated responses and leave with a specific evidence plan—not a hypothetical conclusion.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	Reconnect	Restate the learning goal, practice goal, and student action planned Tuesday. Choose the evidence or anticipated response to examine.	Shared focus
4:00–12:00	Make the student action visible	Show what students did or would do after feedback. Identify one strength and one remaining learning need.	Action + pattern
12:00–20:00	Rehearse the feedback loop	Practice the teacher prompt, criteria, or support that will help students revise, correct, extend, explain, or apply learning.	Feedback routine refined
20:00–34:00	Plan the next evidence check	Identify the next lesson/task, evidence look-for, and how the team will know whether the action moved student learning.	Evidence check plan
34:00–41:00	Course-alike calibration	Share the routine and next evidence check. Check that it responds to the goals and maintains grade-level cognitive demand.	Calibrated plan
41:00–46:00	Close & next step	Record one adjustment for the next learning experience and one date or moment to return to the evidence.	Next-lesson adjustment

PROTECTED INDIVIDUAL WORK WITH COLLEAGUE SUPPORT

WORK WITH COLLEAGUES

WHAT TO DO Complete the designated form work individually first; use colleagues for clarification, feedback, and calibration.

1. Name the feedback-to-action loop: What evidence will students receive feedback on, and what will they do next?

2. Examine evidence or rehearse responses: Use a small evidence set if available; otherwise use likely responses without claiming results.

3. Refine the prompt or support: Make the feedback more actionable while protecting students' own thinking.

4. Choose the next evidence look-for: Decide what will show whether the student action supported learning.

5. Adjust the next learning experience: Record one change to the next lesson based on the evidence plan.

USE THIS REFERENCE DURING GROUP WORK

USE EVIDENCE CAREFULLY

If implementation has occurred, bring a small student-evidence set. If not, rehearse anticipated responses and plan what to collect.

FEEDBACK → ACTION → EVIDENCE

The aim is not more comments. The aim is a student action that produces new evidence of learning.

RETURN TO THE GOALS

The next evidence check should help teachers revisit the Student Learning Goal and the Professional Practice Goal through real lesson evidence.

COLLABORATION IN PRACTICE Protect time for thoughtful individual work; use respectful, student-centered feedback to make the next decision clearer.
