PLC AGENDA

SCIENCE DEPARTMENT • LESSON INTERNALIZATION & GOAL SETTING

From Benchmark Evidence to a Stronger Goal

Supplemental department work session — carry the October 13–16 benchmark-data and lesson-internalization work into the Goal Setting Form and Self-Assessment Part 1.

MONDAY, OCTOBER 19, 2026 | **41 MINUTES** | **GRADES 9–12 SCIENCE • BRING FORMS & EVIDENCE**

TODAY'S OUTCOME Leave with a substantially drafted Student Learning SMART Goal and a completed evidence-based Self-Assessment Part 1 entry that identify the priority standard, skill, baseline, measure, and first review point.

WHY THIS PLC MATTERS The benchmark-data cycle already identified a priority standard, 1–2 skills, a learning pattern, and an upcoming response lesson. Today documents that work in goal language without turning the form into a separate task.

PROTOCOL CONNECTION
Every Day Question 1 and Team Deep Dive Steps 1–2: connect the priority standard, skills, objective, language demand, and mastery evidence to the Student Learning Goal. After-Lesson Reflection: name the remaining learning need and the evidence to revisit.

WHAT TO BRING
Goal Setting Form; Self-Assessment Form; benchmark or common-assessment evidence; October 13 priority standard/skills/learning pattern; October 16 upcoming lesson or task; Lesson Internalization Tool.

FOCUS TO PROTECT
Use an individual baseline with a shared course-alike priority. Draft one focused, measurable student-learning goal—not a broad goal, an invented number, or a list of every benchmark need.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	**Reconnect to the cycle**	Open the October 13 priority statement and October 16 lesson response. Put the standard, 1–2 skills, evidence pattern, and upcoming task next to the forms.	**Planning set ready**
4:00–10:00	**Confirm the evidence story**	State what students can do, are beginning to do, or need support to do. Confirm the individual baseline and the evidence source that will be revisited.	**Baseline + learning pattern**
10:00–16:00	**Build the goal ingredients**	Name the grade-level outcome, measure, reasonable growth target, timeline, and evidence-review point. Use the priority skill—not a generic score—as the center.	**SMART goal components**
16:00–32:00	**Protected form work**	Draft the Student Learning SMART Goal on the Goal Setting Form. Complete Self-Assessment Part 1 using benchmark evidence to name a student-learning strength and high-priority concern.	**Goal + Part 1 draft**
32:00–37:00	**Course-alike alignment**	Check that each goal is individual where baselines differ while remaining aligned to the shared course standard, skill, evidence source, and review point.	**Aligned, individual goal**
37:00–41:00	**Close & prepare**	Record one question or revision. Bring both forms and the upcoming lesson Tuesday to identify the professional practice that will help students meet the goal.	**Tuesday planning set**

PROTECTED INDIVIDUAL WORK WITH COLLEAGUE SUPPORT

WORK WITH COLLEAGUES

WHAT TO DO Complete the designated form work individually first; use colleagues for clarification, feedback, and calibration.

1. **Carry forward the priority:** Use the same standard, skills, and student-learning pattern selected from benchmark evidence; do not restart the analysis.
2. **Name the individual baseline:** Record the evidence source and the current level of performance for the students you teach.
3. **Draft the Student Learning Goal:** Write a SMART goal that names the student outcome, measure, growth target, timeline, and review date.
4. **Complete Self-Assessment Part 1:** Briefly name one evidence-based strength and one high-priority student-learning concern.
5. **Use colleagues to strengthen, not replace:** Check specificity, measurability, and alignment; each educator keeps ownership of individual goal language.

USE THIS REFERENCE DURING GROUP WORK

STUDENT LEARNING SMART GOAL
Use the priority standard and 1–2 skills, your own baseline, a common evidence source, a measurable growth target, and a review point.

SELF-ASSESSMENT PART 1
Use benchmark evidence to name a student-learning strength and a high-priority concern. Keep the writing brief, specific, and evidence-based.

INDIVIDUAL + TEAM ALIGNMENT
Individual baselines and goals can remain different while course-alike teams share the standard, skill, evidence source, and expected student work.

COLLABORATION IN PRACTICE Protect time for thoughtful individual work; use respectful, student-centered feedback to make the next decision clearer.
