SCIENCE DEPARTMENT • LESSON INTERNALIZATION & GOAL SETTING

PLC AGENDA

From the Next Learning Experience to a Practice Goal

Use the internally prepared upcoming lesson to complete Self-Assessment Part 2 and draft a Professional Practice SMART Goal that supports the Student Learning Goal.

TUESDAY, OCTOBER 20, 2026 | **41 MINUTES** | **GRADES 9–12 SCIENCE • BRING FORMS & EVIDENCE**

TODAY'S OUTCOME Leave with Self-Assessment Part 2 substantially completed and a drafted Professional Practice SMART Goal that names one instructional practice, the student action it will support, and the evidence that will show whether it worked.

WHY THIS PLC MATTERS Teachers already planned a standards-aligned response lesson on October 16. The Professional Practice Goal should name the facilitation, feedback, discourse, access, or monitoring move that will help students do the priority thinking in that lesson.

PROTOCOL CONNECTION
Every Day Questions 3–4 and Team Deep Dive Steps 3–4: consider student strengths, misconceptions, access, engagement, critical-thinking moments, anticipated responses, facilitation, feedback, and the student experience.

WHAT TO BRING
Draft Goal Setting Form; Self-Assessment Form; October 16 internally prepared lesson/task; relevant benchmark or student-work evidence; Lesson Internalization Tool; course materials.

FOCUS TO PROTECT
Choose one observable teacher practice that will lead to a visible student action. Avoid broad language such as "improve instruction" or "use more feedback" without naming what the teacher and students will do.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	**Reconnect to the goal**	Restate the priority standard, 1–2 skills, Student Learning Goal, and individual baseline. Open the upcoming lesson where students will address the priority.	**Goal + lesson ready**
4:00–10:00	**Locate the thinking moment**	Identify the task, question, model, explanation, discussion, investigation, or writing moment where students must use the priority skill.	**Key task + product**
10:00–17:00	**Choose the practice lever**	Use Questions 3–4 to identify one practice that will help students succeed: targeted feedback, success criteria, discourse, questioning, monitoring, access, pacing, or support.	**Practice focus**
17:00–32:00	**Protected form work**	Complete Self-Assessment Part 2. Draft the Professional Practice SMART Goal by naming the instructional practice, student action, evidence source, timeline, and review point.	**Part 2 + practice goal**
32:00–37:00	**Course-alike calibration**	Share the practice goal. Check that the teacher action maintains grade-level cognitive demand and makes a specific student action visible.	**Refined goal language**
37:00–41:00	**Close & prepare**	Record the first lesson implementation move and the student evidence teachers will bring or develop Friday.	**Friday evidence set**

PROTECTED INDIVIDUAL WORK WITH COLLEAGUE SUPPORT

WORK WITH COLLEAGUES

WHAT TO DO Complete the designated form work individually first; use colleagues for clarification, feedback, and calibration.

1. **Name the critical-thinking task:** Identify where students will reason, model, explain, analyze, investigate, argue from evidence, or apply learning.
2. **Anticipate the learning need:** Consider likely correct, partially correct, and incorrect responses, as well as language, access, and participation needs.
3. **Choose one practice lever:** Select one observable educator practice that will help students do more of the intended thinking.
4. **Complete Self-Assessment Part 2:** Briefly name a practice strength and a high-priority growth area connected to the Student Learning Goal.
5. **Draft the Professional Practice Goal:** Name the teacher action, the student action it should prompt, the evidence to review, and the timeframe.

USE THIS REFERENCE DURING GROUP WORK

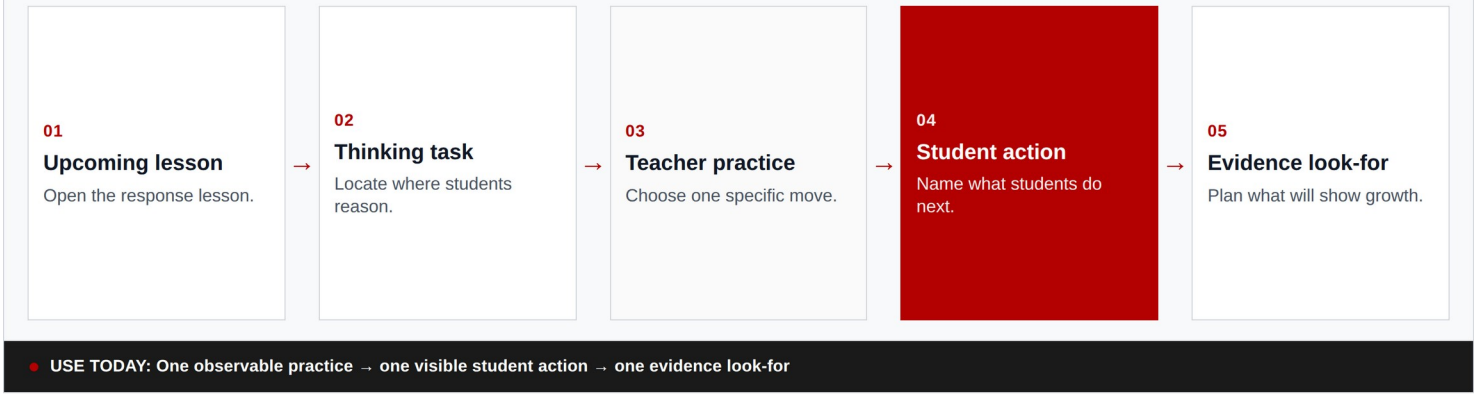

QUESTION 3: FACILITATE THINKING
Plan the key thinking moment, anticipated responses, teacher questions, feedback, and supports that keep the cognitive work with students.

QUESTION 4: STUDENT EXPERIENCE
Plan access, participation, pacing, materials, and time so all students can engage in the grade-level task and use feedback.

PRACTICE GOAL TEST
A strong practice goal answers: What will I do? Where will I do it? What will students do next? What evidence will I review?

COLLABORATION IN PRACTICE Protect time for thoughtful individual work; use respectful, student-centered feedback to make the next decision clearer.

TEACHER RUBRIC CONNECTION **Standard I: I-A-4 Well-Structured Lessons • Standard II: II-A-2 Student Engagement • Standard IV: IV-A-1 Reflective Practice • IV-A-2 Goal Setting**

USE TODAY: One observable practice → one visible student action → one evidence look-for
