NEW BEDFORD HIGH SCHOOL · SCIENCE DEPARTMENT PLC

# Refine the Lesson: Facilitation, Feedback, and Pacing

Strengthen the plan you shared yesterday.

**TUESDAY, NOVEMBER 10, 2026** | **46 MINUTES** | **GRADES 9–12 SCIENCE**

## TODAY'S OUTCOME

**Leave with:** A ready-to-teach lesson with a planned response to student thinking and feedback.

## TODAY'S PLC PLAN

| | | |
|---|---|---|
| **0–4 MIN** | **Reconnect**<br>Return to the same lesson plan shared Monday, along with the student task and success criteria. | **PRODUCT**<br>**Shared plan** |
| **4–10 MIN** | **Set the focus**<br>Identify where students will explain, model, analyze, or argue with evidence; protect time for thinking. | **PRODUCT**<br>**Key lesson moment** |
| **10–28 MIN** | **Rehearsal rounds**<br>In the same pairs or triads, use three six-minute rounds: walk through (2 min), feedback (2 min), and record (2 min). | **PRODUCT**<br>**Rehearsed move** |
| **28–40 MIN** | **Refine the plan**<br>Write a high-leverage question, plan a scaffold and feedback, and protect time for an exit check. | **PRODUCT**<br>**Facilitation plan** |
| **40–46 MIN** | **Commit & prepare for Friday**<br>Teach the lesson this week; keep 3–5 pieces of student work and note where thinking was strong or stalled. | **PRODUCT**<br>**Collection plan** |

### BRING

The same upcoming lesson; the student task and success criteria; a plan to rehearse the key moment; and the Lesson Internalization Tool.

### PROTOCOL CONNECTION

Questions 3 and 4: plan evidence and structures for grade-level thinking, and decide how the lesson will respond to what students show.

**Facilitation anchor:** Practice how you will support students when they struggle without doing the thinking for them.
