

PLC
AGENDA

From Benchmark Data to an Instructional Priority

Use current benchmark evidence and the Lesson Internalization Tool to identify a priority course standard, the 1–2 skills students need to demonstrate, and an upcoming lesson where students will work on them.

TUESDAY, OCTOBER 13, 2026

41 MINUTES

GRADES 9–12 SCIENCE • BRING FORMS & EVIDENCE

TODAY'S OUTCOME Leave with one selected course standard, 1–2 priority skills, an evidence-based learning pattern, and one upcoming lesson or task where the team will respond.

WHY THIS PLC MATTERS Benchmark results become useful when teams connect scores and student work to the standards and skills students need to understand, do, explain, or apply next.

PROTOCOL CONNECTION

Team Deep Dive Step 1: anchor in vision and data. Every Day Question 1 and Team Deep Dive Step 2: identify the priority standard, target skills, learning goal, language demand, and evidence of mastery. After-Lesson Reflection: name who is not yet meeting the bar and the misconception or need to address.

WHAT TO BRING

Current benchmark reports by standard or skill; relevant student work, if available; the course standards or scope and sequence; one upcoming lesson or curriculum task; Lesson Internalization Tool; Goal Setting and Educator Plan Forms, if they help name the priority.

FOCUS TO PROTECT

Choose one high-leverage standard and the 1–2 skills students need to demonstrate. Do not use the time to rank teachers, review every item, or begin a broad reteach plan.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	Reconnect to the cycle	Choose the benchmark, common assessment, or evidence set. Locate the course standard(s) connected to the evidence.	Evidence + standards selected
4:00–10:00	Read the data with a purpose	Locate one priority standard and the 1–2 skills students need to demonstrate: content understanding, practice, reasoning, language, or representation.	Priority standard + skills
10:00–18:00	Name the learning pattern	Describe what students can do, are partly doing, or are not yet doing relative to the standard and skills. Use work or item evidence to identify a likely need.	Standards-based pattern
18:00–32:00	Protected team analysis	Connect the priority standard and skills to an upcoming lesson. Identify the grade-level idea, the task where students will show the skills, and the mastery evidence.	Standards-to-lesson plan
32:00–37:00	Course-alike calibration	Share the selected standard, priority skills, and upcoming lesson. Check that the pattern is supported by evidence and preserves grade-level cognitive demand.	Calibrated priority
37:00–41:00	Close & prepare	Record the standard, skills, learning pattern, lesson/task, and materials to bring Friday for lesson internalization.	Friday planning set

PROTECTED INDIVIDUAL WORK WITH COLLEAGUE SUPPORTWORK
WITH
COLLEAGUES

WHAT TO DO Complete the designated form work individually first; use colleagues for clarification, feedback, and calibration.

1. Select standards-aligned evidence: Choose the benchmark view, item cluster, or student work that best helps the team understand progress on a course standard.

2. Name 1–2 priority skills: Identify the skills students need to demonstrate within the standard: explain, model, analyze, investigate, argue from evidence, use vocabulary, or represent ideas.

3. Describe the pattern: Write a student-centered statement: students can..., students are beginning to..., or students need support to...

4. Choose the next lesson: Identify one real upcoming lesson or task where students can work on the priority at grade level.

5. Save the evidence trail: Bring the standard, skills, pattern, lesson materials, and needed benchmark evidence to Friday's planning session.

USE THIS REFERENCE DURING GROUP WORK**STANDARDS → SKILLS → DATA**

Start with the assessed course standard and the skills students must demonstrate. Then describe the pattern the evidence shows.

NAME THE SKILL PRECISELY

Avoid "students are low." Name the specific understanding, reasoning move, practice, language demand, or misconception students need to address.

SELECT, DON'T SOLVE EVERYTHING

One high-leverage priority is enough. Friday will turn it into a ready-to-teach response in an upcoming lesson.

COLLABORATION IN PRACTICE Protect time for thoughtful individual work; use respectful, student-centered feedback to make the next decision clearer.

TEACHER RUBRIC CONNECTION Standard I: I-A-1 Subject Matter Knowledge • I-A-4 Well-Structured Lessons • IV-A-1 Reflective Practice • IV-C-1 Professional Collaboration

TEAM PLANNING RECORD Capture the team's decision in brief while you work.**PRIORITY COURSE STANDARD**

What assessed course standard will the team address?

1–2 PRIORITY SKILLS

What should students explain, model, analyze, apply, or argue from evidence?

EVIDENCE-BASED LEARNING PATTERN

Students can... / Students are beginning to... / Students need support to...

UPCOMING LESSON + EVIDENCE OF MASTERY

Which task will make the standard and skills visible? What will students produce?
