

PLC
AGENDA

From a Data Pattern to the Next Learning Experience

Use the Lesson Internalization Tool to turn Tuesday's standard-and-skills priority into a ready-to-teach lesson response that maintains grade-level thinking and creates new evidence.

FRIDAY, OCTOBER 16, 2026

46 MINUTES

GRADES 9–12 SCIENCE • BRING FORMS & EVIDENCE

TODAY'S OUTCOME Leave with one internally prepared upcoming lesson: the priority standard and skills, a clear purpose and mastery evidence, a key critical-thinking moment, anticipated responses and supports, an actionable feedback routine, and a next evidence check.

WHY THIS PLC MATTERS Data alone does not improve learning. Students need a coherent next experience where they can use the priority standard and skills through meaningful thinking, targeted feedback, and a chance to show new evidence.

PROTOCOL CONNECTION

Every Day Question 1 and Team Deep Dive Step 2: clarify the priority standard, 1–2 skills, content/language objectives, and mastery evidence. Question 3 and Step 4: anticipate responses and plan facilitation, feedback, and supports. Question 4 and Step 5: plan access, pacing, materials, and the student experience.

WHAT TO BRING

Tuesday's priority statement with the standard and 1–2 skills; the upcoming lesson/task and curriculum materials; benchmark or student-work evidence; Lesson Internalization Tool; Educator Plan, if it names a related practice focus.

FOCUS TO PROTECT

Design a grade-level learning experience aligned to the priority standard and skills—not a lower-level worksheet, a list of answers, or a broad reteach plan. Protect the thinking students need to do.

TODAY'S PLC PLAN

TIME (MIN)	FOCUS	WHAT TO DO	PRODUCT / CHECK
0:00–4:00	Reconnect to the data priority	Restate the selected standard, 1–2 priority skills, and student-learning pattern. Open the upcoming lesson or task where students will address them.	Priority + lesson ready
4:00–11:00	Align purpose & mastery	Use Question 1 to align the standard and skills to what students will learn, why it matters, and the product or response that will show mastery.	Purpose + evidence of mastery
11:00–20:00	Plan the key thinking moment	Use Question 3 to identify the task or question where students must demonstrate the priority skills. Anticipate correct, partially correct, and incorrect responses.	Anticipated response set
20:00–35:00	Protected lesson internalization	Plan the facilitation move, targeted support, feedback prompt, student action, timing, and materials that will help students do the cognitive work.	Ready-to-teach response
35:00–42:00	Course-alike calibration	Share the planned response. Check that the support addresses the data pattern and priority skills without lowering the learning goal or taking over student thinking.	Calibrated lesson move
42:00–46:00	Close & next evidence check	Name what students will say, do, or produce to demonstrate the standard and skills after the lesson and when the team will return to that evidence.	Evidence-check plan

PROTECTED INDIVIDUAL WORK WITH COLLEAGUE SUPPORT

WORK WITH COLLEAGUES	WHAT TO DO Complete the designated form work individually first; use colleagues for clarification, feedback, and calibration.
	1. Anchor in the standard and skills: Name the course standard, 1–2 skills, learning target, language demand, and student product that will demonstrate progress.
	2. Protect the critical-thinking task: Identify where students must use the priority skills to reason, model, explain, analyze, argue from evidence, or apply learning.
	3. Anticipate student thinking: Plan for likely correct, partially correct, and incorrect responses before students begin the task.
	4. Plan feedback that prompts action: Use prompts, criteria, models, discourse, or targeted supports so students revise, correct, explain, compare, extend, or apply.
	5. Set the next evidence check: Decide what new student evidence will show whether the next learning experience moved the priority standard and skills forward.

USE THIS REFERENCE DURING GROUP WORK

QUESTION 1: PURPOSE + MASTERY What standard and skills will students learn and demonstrate? Make them visible in the lesson goal, success criteria, and student product.	QUESTION 3: FACILITATE THINKING Plan the critical task where students use the priority skills, along with anticipated responses, feedback, and supports that keep the cognitive lift with students.	QUESTION 4: STUDENT EXPERIENCE Plan access, participation, pacing, materials, and time so every student can engage in the grade-level task, use the priority skills, and act on feedback.
--	---	---

COLLABORATION IN PRACTICE Protect time for thoughtful individual work; use respectful, student-centered feedback to make the next decision clearer.

TEACHER RUBRIC CONNECTION Standard I: I-A-1 Subject Matter Knowledge • I-A-4 Well-Structured Lessons • Standard II: II-A-2 Student Engagement • II-D-2 High Expectations • IV-C-1 Professional Collaboration

TEAM PLANNING RECORD Capture the team's decision in brief while you work.

PRIORITY STANDARD + 1–2 TARGET SKILLS Carry forward Tuesday's standard and skills. What will students demonstrate in this lesson? _____ _____ _____	KEY THINKING TASK + STUDENT PRODUCT Where will students reason, model, explain, analyze, or argue from evidence? _____ _____ _____
FEEDBACK PROMPT + STUDENT ACTION What will the teacher say, ask, show, or point to? What will students do next? _____ _____ _____	NEXT EVIDENCE CHECK + COURSE-ALIKE FOLLOW-UP What will show progress, and when will the team revisit the evidence? _____ _____ _____
